Simplifying hospital processes with low-code technology

Luzerner Kantonsspital (LUKS) is one of the largest hospitals in Switzerland which believes in using technology to simplify processes and empower its staff.

As part of this mission, the hospital has been exploring low-code apps and how they can help optimize operations and drive efficiencies.

Their benefits were particularly clear during the pandemic, when LUKS used Microsoft PowerApps to create a solution that helped staff triage patients eligible for a COVID-19 antibody therapy. **Built in just a few days**, the app has helped clinicians save time and treat hundreds of patients at a crucial time of need.

// “This was really an eye opener for us. The solution has helped reduce the time we spent in the decision-making process, allowing our physicians to focus more on the patient.”

Beat Sonderegger, Chief Medical Information Officer
Luzerner Kantonsspital

Azure Workloads Launched in Recent Weeks

- Azure Spring Apps in Switzerland North
- All Functions SKUs except Linux Consumption in Switzerland West (was already in North before)
- Azure Stack Edge: Azure Data Box Gateway in Switzerland West (was already in North before)

Microsoft & Windows 365 Updates

- Update on M365 moves to Swiss DCs
 - All SPO & ODfB now moved (for tenants that opted in before the deadline)
 - Delayed moves were now migrated much faster than announced in June
- Windows 365
 - Available as managed access in Swiss DCs
 - General Availability expected in September
