Azure Workloads Launched in Recent Weeks

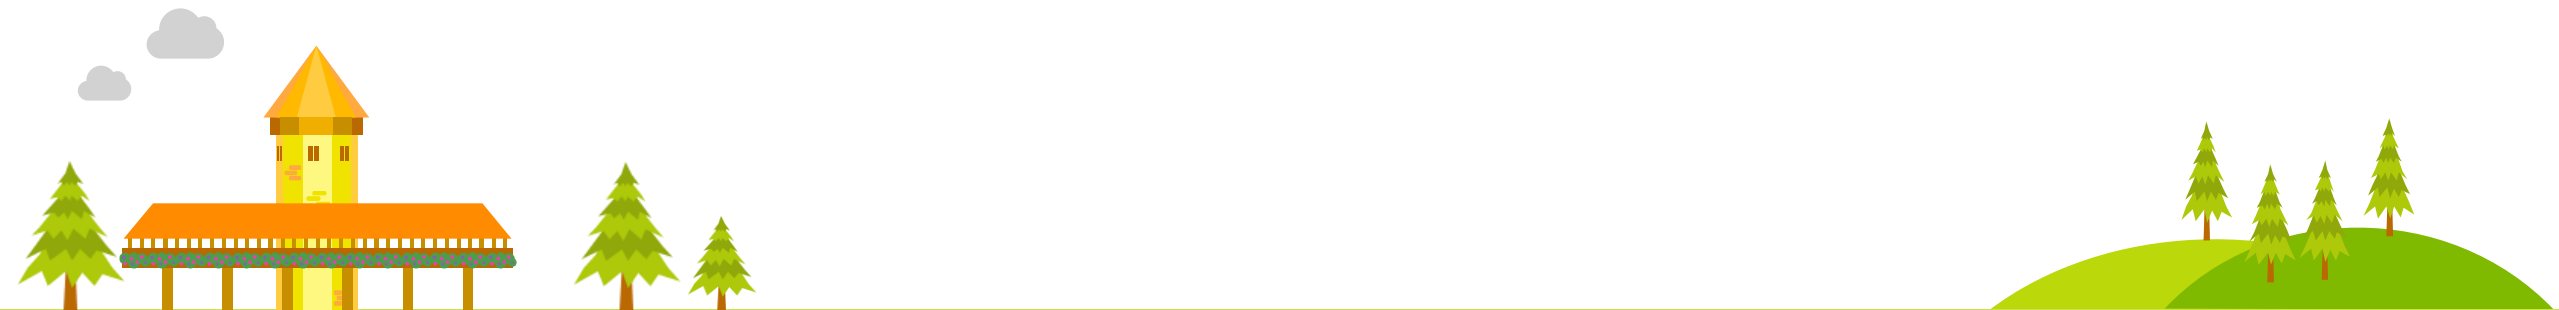

- Azure DNS Private Resolver in Switzerland North

<https://learn.microsoft.com/en-us/azure/dns/dns-private-resolver-overview#regional-availability>

Enables customers to query Azure DNS private zones from an on-premises environment and vice versa without deploying VM based DNS servers. Customers will no longer need to provision IaaS based solutions on their Virtual Networks to resolve names registered on Azure Private DNS Zones and will be able to do conditional forwarding of domains back to on-prem, multi-cloud and public DNS servers.

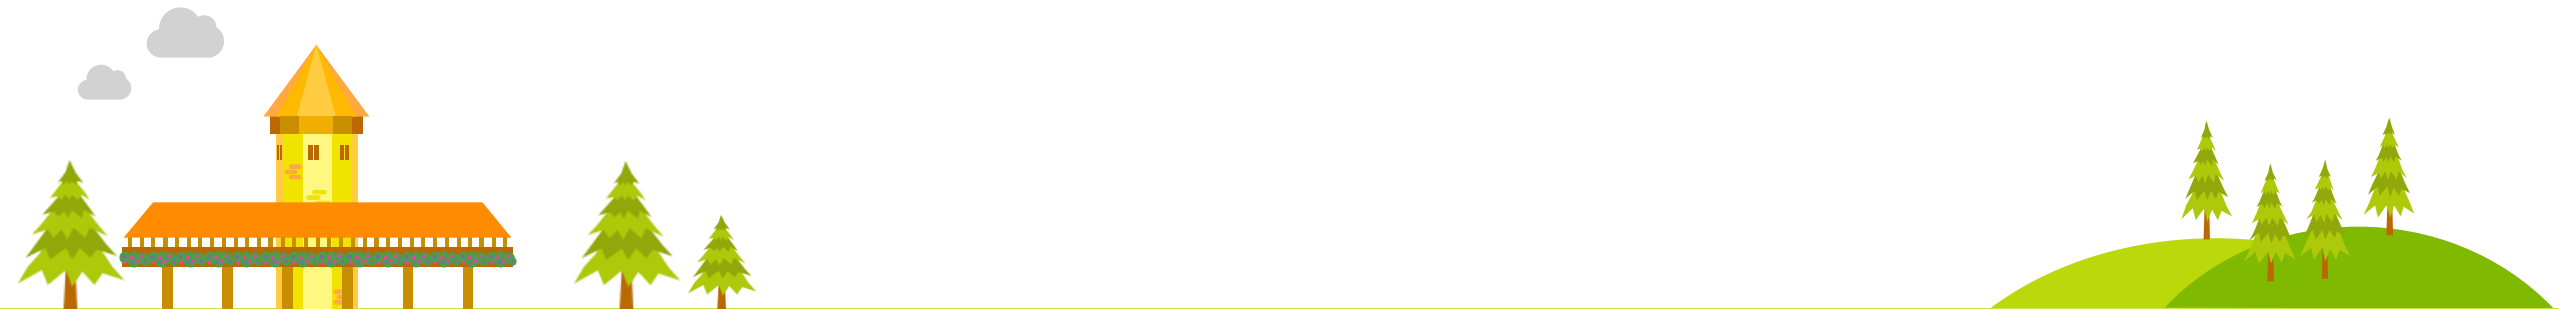

- Azure Database for PostgreSQL: Hyperscale (Citus) in Switzerland West (was in North before)
(renamed to Azure Cosmos DB for PostgreSQL)

SAP Workloads in Msft Swiss DC

- Business Technology Platform BTP launched in Azure Switzerland
- SAP Analytics Cloud SAC on the roadmap
- SuccessFactors on the roadmap

Microsoft 365 Update – see [This Announcement](#)

- From Nov 1 2022 – April 30 2023, there is a new and the final opt-in window to have specific M365 data moved to Swiss DCs within 24 months starting May 2023.
- **If a customer misses this last free opt-in window and wants to get specific M365 data moved to Swiss DCs later, there will be NO further move exceptions and a fee applies.** The add-on has a list price of 2 USD per user per month as an ongoing license – not a one-time move fee.
- No impact currently known for customers who already got moved to Swiss DCs. In the future, local data residency for certain M365 workloads may only be guaranteed if customers purchase the add-on.
- Education Tenants do not receive another free move opt-in

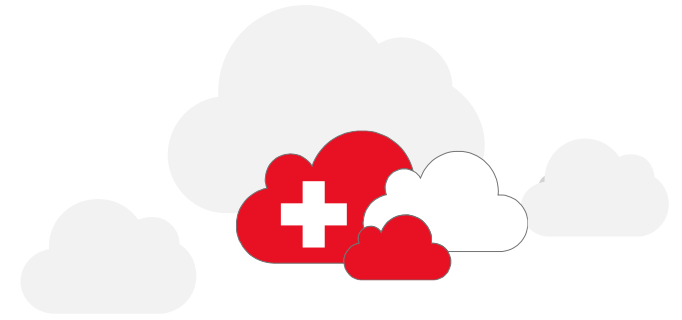

A19: The Advanced Data Residency add-on will be available for purchase upon GA (scheduled for November 2022) through these licensing programs and channels:

- Enterprise Agreement (EA) / Enterprise Subscription (EAS)
- Buy Online (NCE/Modern: Customer-led)

Microsoft 365 ADR add-on purchase via the CSP program (Partner led) is currently unavailable. Availability through CSP is on the roadmap with a target GA in CY2023.

Dynamics 365 Update

- Real-Time Marketing / Customer Journey Onboarding now available with local data residency in Switzerland
