SWITZERLAND			
Products	Non-regional	Switzerland North	Switzerland West

(mouse-over "Future availability" icons for target GA date; subject to change)

# M365 Update

- Whiteboard storage will move to OneDrive for Business & SharePoint Online later, providing better control and data residency – see [this update](#):

In October 2021, any new whiteboards will be stored in OneDrive for Business. This will provide rich content management features, including:

- Data residency
- Permissions
- External Sharing
- Compliance
- Governance

The new behavior is as follows:

Whiteboards will be created in the OneDrive for Business of the person who starts the whiteboard. This includes whiteboards created in the stand-alone Whiteboard applications as well as Microsoft Teams meetings, chats and channels.

Previously created boards will remain in Azure and can continue to be used/edited by end users.

# Additional D365 & PP Applications in Swiss DCs

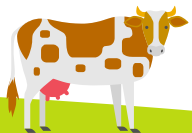

- Launched in Recent Weeks:
  - Dynamics: D365 Finance, Supply Chain Management, Commerce, Sales Insight in Switzerland North, Customer Insights / Audience Insights, **Marketing**
  - Power Platform: Power Apps Portals, Power Virtual Agents
- Expected in H2 2021
  - Power Platform: AI Builder (**under NDA: planned to be launched relatively soon in summer**)
  - Business Central – note: all existing Swiss clients will be moved from EU DCs to Swiss DCs automatically
  - D365 Sales Insights in Switzerland West

# Special Call-Outs on D365 F&SCM/O (1/2)

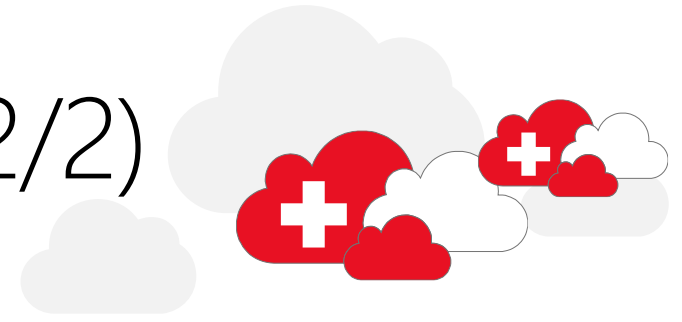

- Default Region:
  - Typically, Lifecycle Services LCS used to set-up and configure F&SCM
  - Even with the local link <https://ch.lcs.dynamics.com>, F&SCM usually targets deployment in a default region such as EU DCs – this is the standard operating model WW and not just the case for Switzerland
  - If a client or partner doesn't want the default region and prefers a local DC: approach this through support (or FastTrack might take it up on their behalf with support)

# Special Call-Outs on D365 F&SCM/O (2/2)

- F&SCM Region Moves

- Not possible to seamlessly move to another DC: "To change the data center, you must redeploy all environments."
- Watch out for third party tools or connectors or plug-ins or customizations – can these be moved as well? If not, potential impact on performance?
