

The Partner Licensing Academy provides the opportunity for all partners to grow their expertise in Microsoft licensing. It's a 30-week program with weekly live training sessions where you can learn about licensing topics of interest and ask your questions. It's all supported by four private learning paths on Get Licensing Ready where you can achieve certifications aligned to what you need to know: [Licensing Fundamentals](#); [on-premises products](#); [Online Services](#); and [Azure](#).

You can attend the program from start to finish, or just join us for sessions that are of particular interest to you. Choose your sessions from the table below based on your own role (sales/licensing, operations, management), the size of customers you deal with (small/medium or large), or product focus area (on-premises products, Online Services, or Azure). You can also register to multiple sessions in one go through the [Partner Licensing Academy landing page](#). These sessions will have subtitles in French, German, Spanish, Italian, Portuguese, Russian and English.

Date	Session title	Level		Products			Role			Customer size
