

Office 365 Storage

Core data repositories

Mailbox >100Gb

In-Place Archive >1Tb

Rehydration + 3rd party data

Inactive mailboxes – no license

Unlimited

Available to each staff member

Offline access via sync client

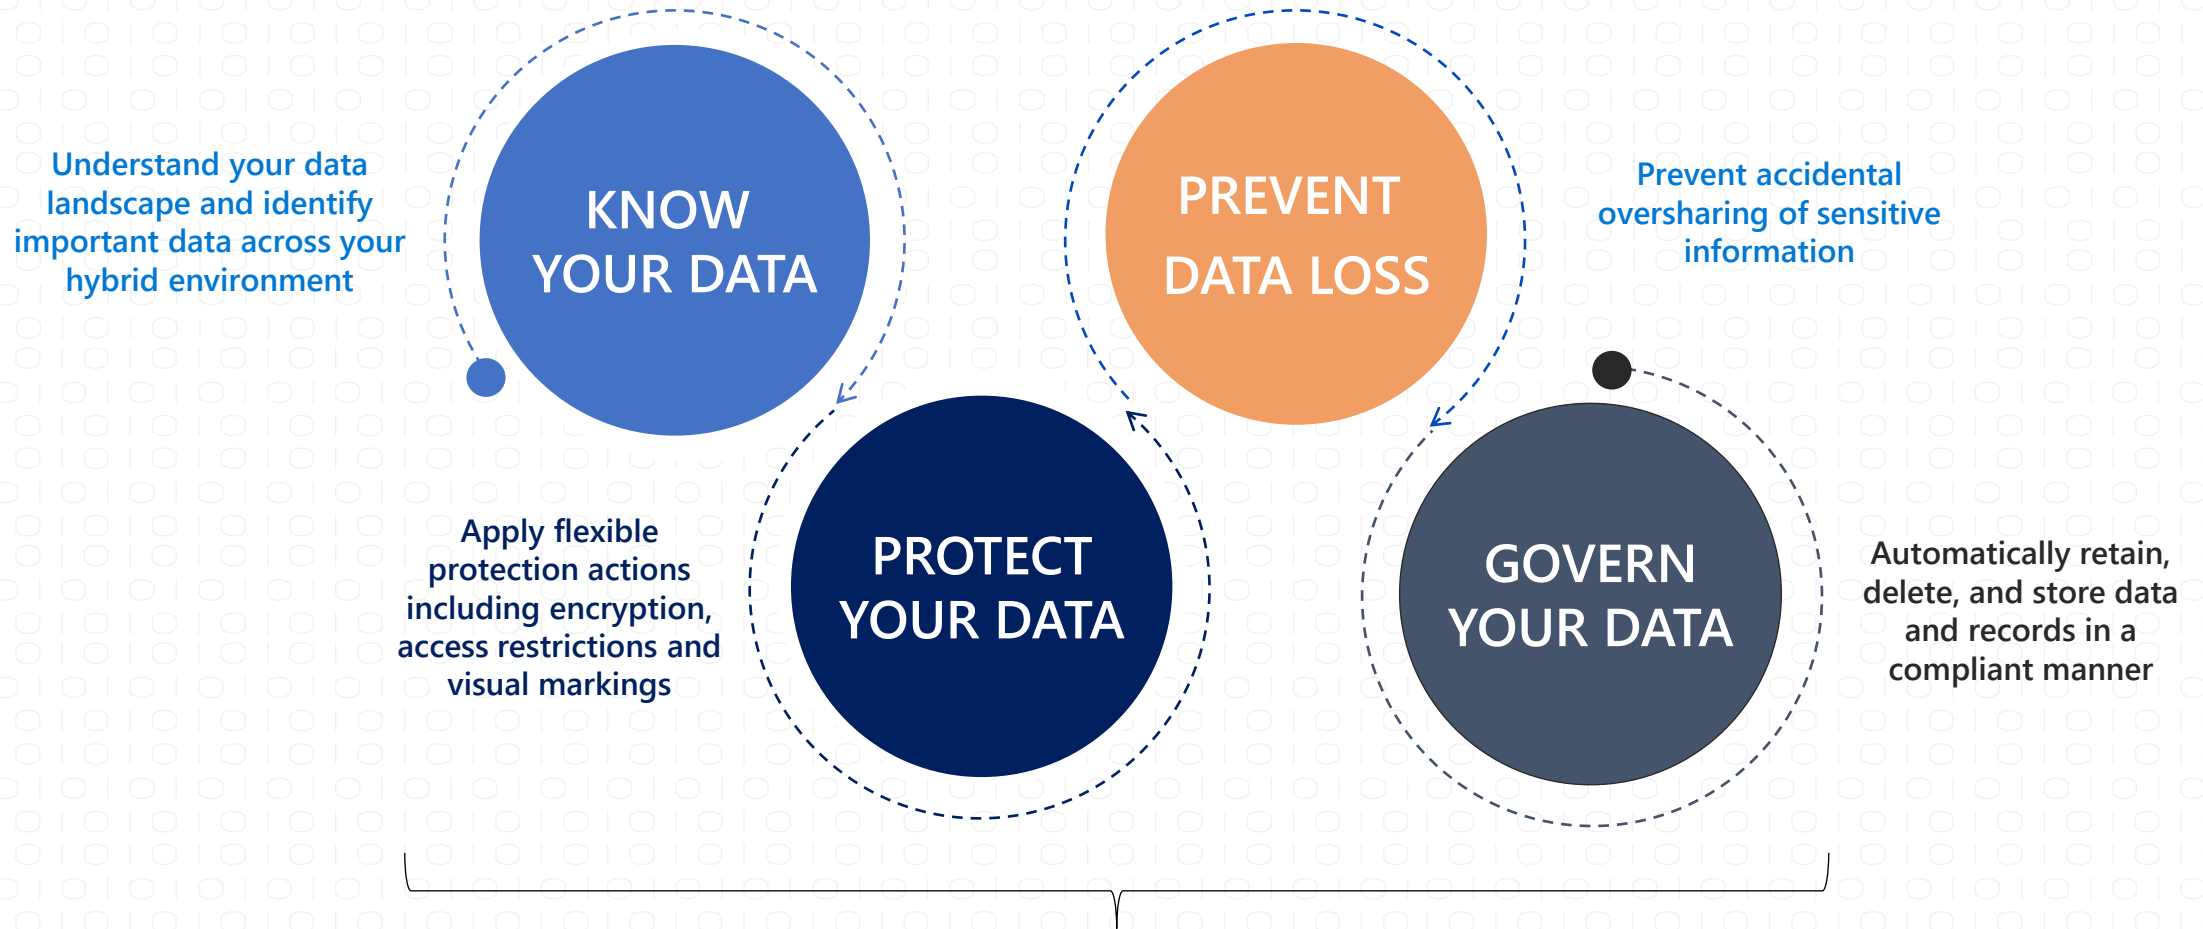

1Tb + 10Gb per user

10,000 users: 101 Terabytes

Versioning – Major 500 revisions default

Information Protection & Governance

Protect and govern data – **wherever** it lives

Powered by an intelligent platform

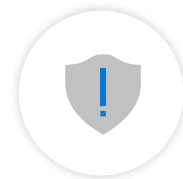

Unified approach to automatic data classification, policy management, analytics and APIs

Information Protection & Governance

Protect and govern data wherever it lives

- Auto classification and Retention
- Supervision for monitoring comms
- Event based triggers for IG
- Label analytics
- Trainable ML classifiers
- Regulatory record

Insider Risk Management

Identify and take action on critical insider risks

- Auto classification and Retention
- Supervision for monitoring comms
- Event based triggers for IG
- Label analytics
- Trainable ML classifiers
- Regulatory record

Discover & Respond

Quickly investigate and respond with relevant data

- Advanced eDiscovery
- Custodian management
- Deep indexing
- Redaction
- Optical character recognition
- Data themes
- Near-duplication

Updates from Ignite 2020 - Compliance

Advanced eDiscovery:

Now supports live documents and links shared in Microsoft Teams. Advanced eDiscovery automatically collects documents from a storage location, such as SharePoint or OneDrive, to pull the content into an eDiscovery case. The attachments are collected, reviewed and exported along with the Teams conversations so customers don't need to manually find and collect the documents one by one.

Retention policies for Teams meeting recordings:

Allowing customers to retain and delete recordings with in-place governance, which means the retention policies apply wherever the recordings are saved without the need to export elsewhere. The rollout for this begins in October. Microsoft will provide guidance on how to leverage Keyword Query Languages to create retention policies for Teams meeting recording.

Updates from Ignite 2020, - Compliance Cont...

Insider Risk Management:

Now offers native integration with Microsoft Teams to securely coordinate, collaborate and communicate on a case with relevant stakeholders in the organization. When an Insider Risk management case is created, a private Microsoft Teams team will also be created and bound to the case for its duration.

Project Cortex, Now Syntex:

Allowing enterprise content management through AI for knowledge and improve compliance and facilitate knowledge discovery and reuse.

Teams Data Loss Prevention (DLP) API:

Allows third-party products to integrate and enable data loss prevention capabilities for Microsoft Teams.

eDiscovery API:

Allows the automation of Advanced eDiscovery processes, including case creation and the entire legal hold notification workflow, to communicate with custodians involved in a case.

Teams Export API:

Allows the export of Teams Messages (1:1 and group chat) along with attachments (file links and sticker), emojis, GIFs and user @Mentions. This API supports polling daily Teams messages and allows archiving of deleted messages up to 30 days.

Microsoft 365 Platform

Interrogating existing repositories for data, in-place and lifecycle management
- policy management is done in Office 365 compliance portal

Connect to your data sources

Connectors help you connect your important data sources to your compliance solutions. [Learn more](#)

Android Archiver

By TeleMessage

A lightweight agent runs in the background and records all Android messages and/or calls and uploads them to be archived in Microsoft 365.

[View](#)

AT&T SMS/MMS Network Archiver

By TeleMessage

Integrated with the AT&T and FirstNet mobile networks. Get a copy of employee SMS & MMS text messages in Microsoft 365. Available only for corporate-owned phones.

[View](#)

Bell SMS/MMS Network Archiver

By TeleMessage

Integrated with the Bell mobile network. Get a copy of employee SMS & MMS text messages in Microsoft 365. Available only for corporate-owned phones.

[View](#)

Bloomberg Message

By Microsoft

Connecting to your Bloomberg Message data is valuable for communication compliance, records management, and eDiscovery solutions.

[View](#)

EML

By Globanet

Connecting to your EML data is valuable for communication compliance, information governance, and Advanced eDiscovery solutions.

[View](#)

Enterprise Number Archiver

By TeleMessage

Provides employees with a business number associated with an app on their phone. Business communication is archived in Microsoft 365.
